## How does it work?

1. The courier or a shop associate inserts a parcel into Cleveron 402
2. Cleveron 402 automatically measures the parcel's height and stores it on a shelf
3. The end-user gets notified and receives the pickup code
4. End-user enters or scans the pickup code at Cleveron 402
5. Cleveron 402 issues the parcel to the end-user within seconds

- 1. Outer case
- 2. Lift
- 3. Shelves

- 4. Console door
- 5. Parcel gateway

- 6. Touchscreen
- 7. Scanner

## Modular design

Measurements	Minimum	Maximum
Number of trays	266	3600
Width	3.7 m	13.7 m
Depth	2.1 m	2.1 m
Height	3.1 m	4.75 m

- > Cleveron 402 can be integrated inside a wall
- > The outer design can be customized to match the surrounding environment

Maximum parcel size 40 x 40 x 60 cm
