## How does it work?

1. The courier or a store associate inserts a parcel into Cleveron 403
2. Cleveron 403 automatically measures the parcel's height and stores it on a shelf
3. The end-user gets notified and receives the pickup code
4. The end-user enters or scans the pickup code at Cleveron 403
5. Cleveron 403 issues the parcel to the end-user within seconds

- > Console location of Cleveron 403 can be chosen along the length of the machine
